

QUICK SOLUTION GUIDE

EIGHT HOURS DELAY

SCENARIO

#650

NAME

MARIA JONES

SPECIALTY

Neurology

SCENARIO DIFFICULTY

ADVANCED

SIMULATION ENVIRONMENT

EMERGENCY ROOM

TARGET

Medical

Dialogues

Ask the following questions to the patient:

Medical condition

- How are you feeling?
- Can you tell me your name?
- What happened to her?
- Is this the first time that this happened?
- Does she have any health problems?
- How long has it been since the symptoms started?

Medication

- Is she currently taking any medication?

Risk factors

- Does she have any allergies?

Physical examination

Perform the following physical examinations:

Airway

- Airway observation

Breathing

- O2 Sat (%)
- Respiratory rate (breath/min)

Circulation

- Blood pressure (mmHg)
- Heart rate (bpm)

Disability

- Blood glucose (mg/dL)

Exposure

- Temperature (°C)

Medical tests

Request the following medical tests:

Decision aids

- Dawn criteria
- Stroke scale (NIHSS)

Imaging

- Cerebral CT angiogram
- Cerebral perfusion CT
- Head CT

Treatments

Administer the following treatments:

Call - Stroke unit

- Call > Stroke unit

Call - Thrombectomy

- Call > Thrombectomy

Call - Thrombectomy by interv. neuroradiology

- Call > Thrombectomy by interv. neuroradiology

Optimal approach

Visualize the approach to end your simulation successfully.
